Fake News & Lying Pictures

Seventeenth-century Dutch printmakers used trolling strategies long before the invention of the internet!

Is this a meme from the 17th century?

They hid damaging information, told outright lies, and made fun of important people using their freedom of artistic expression.

At that time, the Dutch government had little power to censor the media or stop these images from reaching larger audiences. Printmakers used the lack of censorship to their advantage.

Cropped image: Johannes Wierix (attributed to), Willem van Haecht (I), De slapende leeuw (The Sleeping Lion), 1567. Engraving on paper.
1. Use familiar images from pop culture to make funny connections and comment on current times (memes, political cartoons, etc).

2. Use animals to show human characteristics (like a cunning wolf as a politician!)

3. Uplift your heroes! Create a portrait of someone that deserves the attention, and/or write a poem about them.

Who do you think these animals represent? Fill in the blanks!
